

DAFS Trader

Update & Installation Guide

Download & Installation

For Users who downloaded the DAFS Trader previously

Go to App Store – Click on **Profile** and enter the "Account" page - Click on "Purchased", then switch to "Not on This iPhone" button on the right to view installed apps - Download and install the DAFS Trader

For Users who have never download the DAFS Trader or changed Apple Phones

Go to App Store - Search for "DAFS" in the search box to download the DAFS Trader

For Users who stay in Mainland China

1. Please download and install the **TestFlight** package: <https://testflight.apple.com/join/hMjbhsF2>
2. Click "View in App Store" in "Step 1" to download the TestFlight application and return to the browser after downloading (do not open the TestFlight application).
3. Click "Start Testing" below Beta version in "Step 2," then click "Install" after redirection, and you can use it normally after installation.

Update

Automatic Update

Go to Settings – Select App Store - Turn on App Updates

*Note: If automatic updates are set, all apps installed on your phone will be updated automatically.

Manual Update

Go to App Store – Click on **Profile** and enter the "Account" page - Check update list or click "**Purchased**" below to view the installed apps - Click on "**Manual Update**"
